Westall Community Hub

The Westall Community Hub aims to deliver important community and learning services to support the needs of children, young people and adults.

Kingston Council, with a financial contribution from the Victorian Government (\$2.35 million), will soon start building a \$9 million community and learning hub to meet the current and future needs of people in the northern suburbs of Kingston.

This wonderful new hub will be built on the Westall Primary School and Secondary College site, to help ensure support, learning and educational services for all ages are available in one spot.

It is planned that the Hub will provide a range of services such as:

- a **public library branch** with a digital and online focus
- **early childhood education** and care rooms to deliver **child care** and **kindergarten** services
- **maternal and child health**
- a number of multi-use **consulting rooms** to host a range of **support** and **health services**
- **community group** rooms
- a **community kitchen** and
- **offices** and waiting/reception areas.

WHEN WILL BUILDING START?

Building of the Hub will start in early 2016 and is expected to be finished in early 2017. However, in order to get the site ready for building, Council needs to clear the site starting around the middle of the year.

The first change will be the moving of the Primary School front yard play equipment and the removal of the three portable buildings at the back of the Primary School.

Council will work with Westall Primary and Secondary School to secure the building site so it cannot be opened by children.

FURTHER INFORMATION

Regular information on the Hub will be available on Kingston Council's website.
